SECRETARIAT
GEN'L SECTION
No

12 Returned with compliments to the General Secretary to Govt,
The estimate provides for laying 6" pipes of the major portion of the length and 7" for a very short length As a rule, in view of the fact that all the house connections are of 4" diameter, nothing less than 7" is allowed for sub-mains in the Cities This has been followed in the Mysore City Sewerage scheme, and I would not advise a departure from this rule in the case of Bangalore City extension

13 No details are given for a septic tank for which there is a lumpsum of Rs 500 The position of the septic tank is quite close to the Health Camp and the north-east wind will blow right from the septic tank on to the Health Camp

13/1/33

Serial No

and also the houses on the east end road and the Pattalamma street which I think is objectionable

14 There is difficulty for water now No water for flushing the sub-mains can be obtained until the new water main to Basavangudi extension is sanctioned and laid The estimate for this is still pending disposal with the Municipality The flush made in each house is not sufficient to keep the sub-main itself flushed properly

PROCEEDINGS OF THE MANAGING COMMITTEE MEETING HELD ON 23-11-1932

Additional Subject No 2

To consider letter No 848 dated 16th November 1932 from the Executive Sanitary Engineer Bureau of Sanitary Engineering, Bangalore sending for sanction an estimate for Rs 6,750/- for the first portion of submain sewer No 9 fromthe Conservancy lane south of Public Square Basavangudi upto the East End Road near Health Camp Bangalore City, which forms a part of the comprehensive drainage scheme of Bangalore and the memo of the President thereon explaining the necessity for taking up the scheme immediately and proposing that the cost may be met out of Rs 19,000/- provided for unfiltered water supply in the current year s budget

Resolution - Resolved that the estimate be sanctioned and that the work should be executed under the supervision of the Municipal Engineer, as per plan submitted Tenders should be invited by the Municipality

Sd B KEMPANNA
Chairman

This is a technical work Sanitary Engineer has not included any amount for supervision charges Actual amount for the work and materials have been calculated If supervision charge is made it is alright that we should undertake to save that amount Now we will have the benefit of expert work without any cost I recommend this may be entrusted to Sanitary Engineer for execution

Sd B K GARUDACHAR
President

for Municipal Commissioner in charge

M N R

City Municipal Office

Bangalore, dated 18th November 1932

MEMO

When Basavangudi Extension was formed a comprehensive drainage scheme was made The drainage was executed as the houses sprang up in the area The locality referred to i e the South East Extensio of Basavangudi was allotted to Mohammadans and called Mohammadan Bloc As the people who took up sites there were very poor, they could not build houses as briskly as inother areas Hence the drainage work wa not taken up, Now, the area has become a cosmopolitan block and a number of houses have been built The sullage of every house having been let into the earthen drain of the place for a number of years, the place has become very sickly If something is not done immediately, the residents of the locality will be put to much inconvenience and trouble The question of extending the drain as settled previously was examined and it was found that it was impossible to take up the work considering the financial position of the Municirality Then a consultation was made and examined in person with the help of the Sanitary Engineer to find out means to solve the problem with minimum cost It was decided that a sceptic tank as recommended by the Sanitary Engineer was the best means of giving relief to the people of the place I inspected the spot with the Sanitary Engineer and was convinced that this was the best means of taking away the sullage of that locality I wish the Managin Committee will consider and approve of the scheme which is very essential for the health of the people in the locality The funds will be provided from the savings under 9 Miscellaneous, Unfiltered Water Supply '
